INFINITY CHARTS

NEEDLEPRINT INFINITY CHARTS have been created to last to you to infinity, to give you an infinite number of creative ways of enjoying your chart and to have an infinitely small carbon footprint.

No more coffee stained, creased, torn, dog-eared charts. You can work with your charts directly from your screen or print them out in the size that is most comfortable for you to use. If you lose or spoil a sheet, it is not problem, you can simply replace it yourself.

You like the sampler, but you want to see how it would look in different colourways; you would like to add custom initials; you would like to tweak a motif here and there until it is more to your liking. Using INFINITY CHARTS you can do just this. And more! You would like to use some of the motifs to make a small item, a special gift for someone. You can do it. You can cut and paste motifs from the chart to create your own designs. Think of how much use, how much value, how much fun you can have from one single chart! All our charts come with permission for you to customize and reuse the motifs - and sell for charity or for commercial purposes. We simply ask that you do not copy the original work (which a museum has to pay the upkeep for) and sell that yourself.

You like the samplers you can buy from overseas - but you don't like the postage. We have removed all postage costs from our INFINITY CHARTS including insurance costs for loss in transit etc. More importantly we have not consumed card and inks to print your chart (although we always work with accredited environmentally friendly printers), we have removed packaging, fuel costs to take items to the post or airmail fuel. It is up to you to consider how many times you need to print out your chart.

Our first offer:

THE BEATRIX POTTER INFINITY CHART has a number of purchase options for you:

1. You can buy an editable CSD format file for download together with the correctly licensed software to enable you to work on your chart - to edit it, recolour it, cut and paste motifs etc for \$20. The CSD format runs on PCs only and not MAC (a MAC version for use with MACStitch is coming shortly thanks to the expertise of Steve Rousseau in Canada.)
2. If you would like the CSD software on DVD POSTED to you in addition to being able to download it and your chart, then we have to make an additional charge to cover postage and so the total cost is \$30.
3. You can simply buy a PDF format for \$16. This is a document that can be viewed on your screen and can be printed out. It cannot be edited.

All our downloads are via the NEEDLEPRINT secure sharefile. You pay for the option you choose and within 24 hours, usually a lot less, you will be sent your own password to download your items, ready to use straight away.

If you have any questions at any time about these or any of our other products, I shall be happy to help you.

KINDEST REGARDS,

Jacqueline
